

Brief Interview with Dr. Sabzali Javadov

Anatomy & Physiology: Current Research

1. How many years have you been practicing and/or performing research?

More than 30 years .

2. What is the research topic you are working on now?

The role of mitochondria in cardiac diseases, particularly, ischemia-reperfusion and heart failure.

3. What makes an article top quality?

Novelty of results, critical discussion, and good presentation including grammar, writing style, figures, etc.

4. What are the qualities you look for in an article?

Novelty of results and scientific significance of the article.

5. Do you have any research funding (NIH or other national funding) now?

Yes, I have NIH award granted until 2017.

6. When did you become an editor of OMICS Journal?

Since 2009.

7. What is your greatest career accomplishment?

Professor in Europe before in 1995-2003.

8. How does the research published percolate through to practitioners?

Unfortunately, only few percent of studies can find a way to practitioners. This is the main issue of current research, especially biomedical research, in the world.

9. What is the purpose of serving as an editor?

To assist with selection of high-quality competitive papers for publication.

10. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Yes. My Editorial paper was published in Anatomy and Physiology in 2012 .

11. Do you plan to contribute any editorials or papers to OMICS Journals in the near future?

Yes.

12. Do you have any trouble with OMICS Journals in the past?

No.

13. Would you recommend OMICS Group to your friends or colleagues?

Yes.

14. How do you differentiate Anatomy & Physiology: Current Research with other journals in the field?

It should mostly focus on original studies in the area anatomy and physiology under normal and pathological conditions. Also, the journal should have Special Topics.
