

Ferit Gurbuz

Editorial Note

On behalf of the Board of Mathematica Eterna and my co-editors, I am glad to present the Volume 9, Issue 1 of the journal. The journal established in September 2011 has now published 9 volumes; three issues in a year. The journal is now getting indexed in Directory of Open Access Journals and also by different academic forums. Mathematica Eterna is a peer reviewed an open access journal that aims at providing a dedicated forum for the researchers and academicians to share and exchange knowledge and innovations in the field of pure and applied mathematics. The journal publishes articles based on updated and reliable information in mathematics and accepts articles in the form of research articles, review articles letters, perspectives, opinions, commentaries, reviews, letters to editor, editorials and short communications. One of the objectives of this journal is to encourage publication from different streams of research that helps to enrich further the discourse on Mathematics. Readers can particularly notice progress made in this direction through the Research Articles which is emerging as an important section of this journal. We take this opportunity to thank the authors/publishers for sending their books for review and excellent book review by authors. During the calendar year 2019, ME received a total of papers, out of which 90 articles (90%) were rejected in the preliminary screening due to plagiarism or being out of the format. During 2019 around 45

articles were subjected to the peer-review process and 10 of those were accepted. Total of articles were published (at an average of 4 articles per issue) of which, 50% articles were by foreign authors.

I take this opportunity to acknowledge the contribution of Ferit Gurbuz during the final editing of articles published and the support rendered by the editorial assistant, John Mike in bringing out issues of ME in time. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of ME, the office bearers and staff of IPA secretariat for their support in bringing out yet another volume of ME and look forward to their unrelenting support to bring out the Volume of ME in scheduled time.

Two very distinguished scholars whose role particularly have been seminal in promoting Mathematic Eterna in developing and emerging economics namely Prof Ferit Gurbuz and Prof. Bor, H. are joining as Editorial Advisor of this journal. I am sure with their guidance, we will be able to make this journal more relevant to the research community. A brief profile of the two scholars is enclosed below.

Dr. Ferit Gürbüz is currently working as an Assistant Professor, Hakkari University, Hakkari, and Turkey. He received his Ph.D. from Ankara University, Ankara, Turkey in 2015. He serves as an editorial board member and reviewer. He is written by so many articles.

Dr. Bor is currently working as an Assistant Professor, Ankara University of Social Sciences, Professor Emeritus-Ankara University, Turkey. He serves as an editorial board member and reviewer. He is written by so many articles.
