Editorial Note

The New Year promises many exciting developments Global Journal of Biology, Agriculture & Health Sciences. Popularity of the GJBAHS can be ascertained by the reader's interest, curiosity and support, which is estimated from the response we have been receiving from diverse geographical regions all across the world. However, enormous impacts of such usage on agriculture, environment and ecosystems, biodiversity, communities, and socio-economic sector have been documented. Soils have become inert, saline and dead in many places. Available scientific literature discusses inherent potential of pesticides to induce chronic

health effects such as cancer and hormonal disorders as well as reproductive and developmental impacts. Human health impacts caused by pesticides a significant concern for a long time and making them freely available worldwide. I am delighted to mention that during the year 2019, all 3 issues of volume 8 were published online well within the time. Congratulations to all of our Editorial Board members, reviewers, authors and readers for achieving this distinction. GJBAHS received a total of 18 papers, out of which two of the articles were rejected in the preliminary screening due to plagiarism or being out of the format. Around all the articles were subjected to the peer-review process, accepted & published in journal.
