### Editorial Note

The New Year promises many exciting developments Global Journal of Biology, Agriculture & Health Sciences. It is the most common method of fish culture. Water is maintained in an enclosed area by artificially constructed ponds where the aquatic animals such as the finfish and shellfish are reared. The ponds may be filled with canal water, rain water, bore well water or from other water sources. The pond must be constructed after proper site selection. The climate, topography, water availability and soil quality of the region influence the character of the fish pond in all areas of Global Journal of Biology, Agriculture and Health Sciences accepts articles in a variety of formats including feature articles like short commentaries, review articles, research articles, responses, interesting case reports

any many more. Examples of content areas which are not only limited to Biology, Agriculture and Health Sciences include, Zoology and Botany Biochemistry, Horticulture, Poultry science, Veterinary, Viticulture, Vegetable Science, Food Science & Technology, Weed biology, Floriculture & Landscaping, Forestry & Natural Resources, Plant Breeding & Genetics etc. and making them freely available worldwide. I am delighted to mention that during the year 2019, all 3 issues of volume 8 were published online well within the time. Congratulations to all of our Editorial Board members, reviewers, authors and readers for achieving this distinction. GJBAHS received a total of 18 papers, out of which two of the articles were rejected in the preliminary screening due to plagiarism or being out of the format. Around all the articles were subjected to the peer-review process, accepted & published in journal.
