Great cases and great discussion

Clay J Cockerell

Cockerell Dermatopathology, USA

To exemplify the importance of clinicopathological correlation, we created this lecture containing interesting and complex dermatological cases. The main objective of this talk is to enhance diagnostic and therapeutic skills and understand importance of clinicopathologic correlation in dermatology. This will be accomplished through the review and discussion of highly educational dermatological cases, making emphasis on clinical and histopathological pearls. Audience will learn about newly described and rare conditions and using interactive multiple choice questions you will have an opportunity to test your diagnostic skills and clinical knowledge.
