8th International Conference on **Cosmetology & Skin Care**

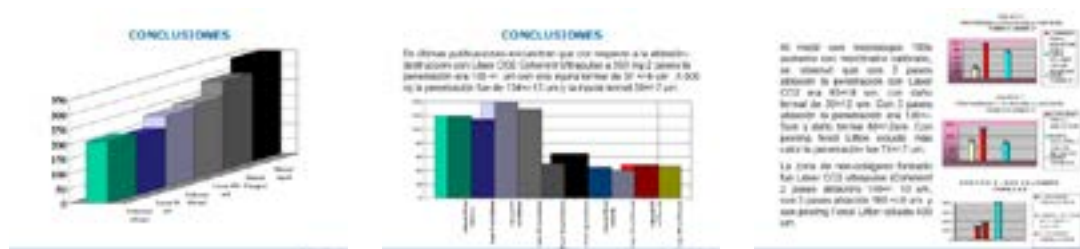

&
14th International Conference and Exhibition on
Cosmetic Dermatology and Hair Care

August 13-14, 2018 | Madrid, Spain

The best neocollagen production: histologic comparison between deep –depth chemical peelings De Rossi Fattaccioli`s formula phenol croton (using heat like a new penetration factor) = baker & gordon fintzi formule

De Rossi Fattaccioli
National University of Tacna, Peru

Statement of the Problem: Chemical peelings it's the most ancient procedure to remove and repair the photodamage effects (Ebers papyrus). The newest with Erbium ,Neodimium YAG Carbon Dioxide (CO₂) Laser (ultrapulsed, fraccional & others) are be using for the same : remove sun damage elastotic collagen on reticular dermis , atrophic basal-malphigi stratum and hyperkeratosis cornium stratum and , the paramount , production of the best neoCollagen.Olders Phenol Deep Chemical peelings (Backer-Gordon ,Litton ,Fintzi and Hetter formulas) have been used and still using extensively for facial skin rejuvenation.I introduce a “new” Personal Formule (1986-2017) wich use the HEAT like a penetration factor and Glicerine like buffer and booster on the same time in this formule . These studies have been done to compare the effects of the treatments using histologics views in different periods of time.Biopsies of facial skin treated on pre and retroauricular zone were maked: 24 hours after the application of a new adaptation of the Baker´s formula : DeRossi Fattaccioli`s formule for deep chemical peeling.Areas nearby the first biopsies were biopsied after 12 hours, 24 hours, 1 week, 2 weeks, 2 and 3 months after; and 24 hours, 48 hours, 72 hours, 1 week, 1 year and 10 years after application of De Rossi Fattaccioli`s Phenol-Croton . Initial biopsies showed deep chemical peeling Phenol-Croton oil DeRossi Fattaccioli`s Formule,have produced a thick zone of new collagen formation, and at 3 months comparatively with others formules of deep chemical peeling with DeRossiFattaccioli`s formula show a thicker and wide new collagen zone .Proving that this new Formule is more effective than the others and I introduce it for its discussion.Showing the histological findings of the Baker & Gordon and Fintzi Formules that I found on the bibliography.
