# **Cosmetology, Trichology & Aesthetic Practices**

**April 25-27, 2016 Dubai, UAE**

## **Lip aesthetics and fillers, achieving the best results with careful analysis and attention to anatomy**

**Kamal T Sawan**

Sawan Surgical Aesthetics, USA

Lip augmentation with fillers is one of the most common uses of fillers in the ME region. The lip has a 3-Dimensional structure with the only framework being the relation of the muscle attachments to the skin. Attention to the anatomy and the desired lip look is key for best results. In this presentation we will review the normal lip anatomy, classification of lip shapes, lip measurements based on PHI or the golden ratio and what filler to use based on fillers characteristics and desired look.

### **Biography**

Kamal T Sawan completed medical education at the Royal College of Surgeons in Ireland in 1993. His training in Plastic Surgery was completed at Johns Hopkins Hospital in the USA. He worked at the University of Oklahoma and was the Chief of Plastic Surgery and Program Director for 10 years. He is a respected member in the field of Plastic Surgery and the American Society for Aesthetic Plastic Surgery with many publications. Having a passion for innovation and best results, he launched Sawan Surgical Aesthetics in Oklahoma in 2015. His focuses in practice are facial rejuvenation and body contouring after weight loss surgery.
