

6th International Conference on

Clinical and Experimental Dermatology

May 04-06, 2016 Chicago, USA

Reza F Ghohestani

Texas Institute of Dermatology, USA

Challenging cases in RheumDerm

Many diseases initially present with skin manifestations and may often have an overlap with rheumatologic symptoms and diseases. Patients who have cutaneous features of autoimmune and connective tissue diseases have been a challenge for both Dermatologists and Rheumatologists. Selected challenging cases with combined Dermatologic and Rheumatologic manifestations will be presented and different aspects of diagnosis, natural course and treatment will be discussed.

Biography

Reza Fredrick Ghohestani completed his Internship in Surgery at Penn and Derm residency at Thomas Jefferson University.
