

3rd International Conference and Exhibition on **Cosmetology & Trichology**

July 21-23, 2014 Hampton Inn Tropicana, Las Vegas, USA

Female hair loss has increased over 20-30% especially with black American women

Madlena Epreman

Dillon Hair Restoration, USA

Due to Alopecia- traction, chemical, medications, diet and health/alopecia aviate, traction chemical and diet on and off diet pills, major diet change and food that are not working for them at a certain age. Diabetes and medication they are taking and what might be the cause if they mix medications after birth and after taking birth control Thyroid and thinning it causes black American women weaving, braiding chemical straightening of hair stress. There are solutions but not much for women these days. The only ones that show results are plasma rich protein plus Ace injection unless the area is scarred, already many Physicians are adding it to their practices and have had results but it is still soon for women.

Biography

Madlena Epreman has been in the hair industry for over 15 years and worked with over 50 physicians and technicians in the field. She was a part of the ISHRS and team. She had worked for many big companies and chairmen in the industry, who were her mentors, every company weather Bossley or Hair Club. She created the best contribution with the team. Worked with Dillon Hair Restoration and Establishing USA Hair Clinics.
