May 24-25, 2018 Osaka, Japan

Christopher B Chambers

University of Washington School of Medicine, USA

Non-surgical techniques for facial rejuvenation and contouring

This talk will review the relevant anatomy and techniques needed for facial rejuvenation with dermal fillers and chemodenervation. The talk will cover the types of products available and the advantages of each. The talk will cover placement, concentration and types of products needed for facial contouring. The talk will include before and after photos as well as images showing injection sites. The audience will learn the basics of facial rejuvenation as well as techniques to provide chemical brow lifts, eyelid fissure symmetry and reduce a gummy or asymmetric smile.

Biography

Christopher B Chambers has received his Bachelor of Science degree at the University of Notre Dame. He went to Medical School at The Ohio State University before completing his Residency at the Kresge Eye Institute where he served as Chief Resident.
