

10<sup>th</sup> International Conference on

# **Clinical & Experimental Ophthalmology**

November 21-23, 2016 Dubai, UAE

## **Particularities of the anti VEGF treatment in children**

**Diana Cormos**

Ocusan Eye Clinic Brasov, Romania

This presentation emphasizes the particularities of the anti-VEGF treatment in children, highlights the latest results of the studies using the anti-VEGF treatment in the therapy of retinopathy of prematurity and presents the personal experience with the pediatric use of those therapeutic agents.

### **Biography**

Diana Cormos has completed her PhD in 2008 at the University of Medicine and Pharmacy "Iuliu Hatieganu" in Cluj Napoca, Romania with the thesis entitled "Screening and Early Treatment in Retinopathy of Prematurity". During 1998 to 2009 she taught at the Transilvania University School of Medicine in Brasov. She is the Co-Founder of OCUSAN Eye Clinic in Brasov. Her areas of interest are pediatric ophthalmology and strabismus, cataract surgery, medical retina and glaucoma.
