

International Conference on Eye Disorders and Treatment

July 13-15, 2015 Baltimore, USA

Jan Bonel

Visiometrics, Spain

Quality of vision, what do we need to know?

The talk will deal with key understandings of PSF and MTF in describing the limits of optical quality and vision. We have never before had the possibility to really understand what the patient is really seeing, The HD Analyzer offers the very first way of understanding all of the light reaching the retina and how that correlates with what the patients manifest seeing.

Biography

Jan Bonel is presently the CEO of Visiometrics. In the early 80's, he started out in his native Sweden as Sales Representative at Pharmacia, AB. These were the early days of IOL's and Healon™. This is truly where he got involved with ophthalmology, both professionally and emotionally. With his experience as teacher and already trained economist, at Pharmacia he received an extraordinary background. As Distributor for Chiron Vision, he belonged to the select group which brought LASIK, with Hansatome and Technolas, to the world in 1992. He with Dr. Güell, were the first in the world to promote LASIK as a standard procedure. He also served on the European board of Chiron Vision. After 10 years of dedicated hard work with the finest experts, in the optic space, the HDAnalyzer™ was launched, a true game changer allowing to understanding the objective part of vision.
