

International Conference on **Eye Disorders and Treatment**

July 13-15, 2015 Baltimore, USA

Transfer factor strengthened and its contribution to the visual health and integral

Daniel Valverde

University of Guayaquil, Ecuador

99% of diseases are directly related to the imbalance of the immune system, this surely also affects the visual and ocular system of our patients, if we have a stronger immune system then we have better prospects of overcoming the disease more quickly and more effectively, it's what we do in our daily clinical practice with very satisfactory results.

Biography
