

# 4<sup>TH</sup> WORLD CHINESE MEDICINE, YOGA & MENTAL HEALTH CONGRESS

September 17-18, 2018 | San Diego, USA

## **The brain: Cellular-neuro-muscular-memory**

**Margaret Rogers Van Coops**  
Integrative Medicine, USA

Several generations before embodiment, each spirit chooses a Soul Structure Coding relative to its need to ascend in vibration into The Oneness. That coding is entwined within the DNA during the first Trimester when the zygote is splitting and growing the child within the womb. The Spirit of the child-to-be does not enter the womb until the quickening. During the pregnancy the coding is activated along with the DNA and RNA of the mother. Once the child is in the birthing stage, an awareness of self is begun the moment flesh touches flesh in the birth canal. Once born the Soul Structure Coding kicks in. Dr. Margaret will explain how the emanations of the five bodies that make up the Aura are activated to establish a personality and still later characteristics that may be either negative or positive, depending on the up-bringing of the child.
