

2nd International Conference on**PHYSICS**

August 28-30, 2017 Brussels, Belgium

Protection against the pseudoscientific swindlers usurping the power of world scientific community is necessary to science- About mechanical essence of physical interactions, a philosophical and natural-science inconsistency quantum - relativistic sub consciousness

Vladislav Cherepennikov
Newton Society, Russia

Application, in the research spent by the author, of laws of classical mechanics to mechanical models of interactions of spherical sources and the drains radiating and absorbing streams of material particles of an ether, in full conformity with views of classics of natural sciences Faraday and Maxwell have allowed for the first time on a mechanical basis:

To receive more generally the equations practically all known physical interactions in the analytical integrated form and to prove, thereby, mechanical essence of the physical phenomena;

To explain: cyclic evolutionary sequence of development of objects of material systems; the reasons of an inclination of axes of rotation of planets and the Sun to a plane ecliptic and discrepancies of axes of rotation with magnetic axes; the pear-shaped form of planets and the Sun; the mechanical nature levitation John Searle's disks and other similar researches; the reasons of a paradoxically of modern electrodynamics; negative results of experiences Michelson - Morley application Newton's the corpuscular theory; effect of "increase in relativistic weight», as result of incorrectly interpreted experiment and so on.

The method essence consists in definition of distribution of speeds and accelerations of streams of particles of an ether by means of superposition of fields of speeds and accelerations on surfaces of co-operating spherical sources and drains. Applying Newton's second law (the differential law of mechanical movement) and Newton's third law (equalities of action and counteraction) to streams of particles of an ether and, integrating as a whole on a surface of a spherical source or a drain in the set direction, we receive the equations of sizes of the forces operating between co-operating spherical objects.

Biography

Vladislav Cherepennikov is a honorary Academician of the International Academy of Quality and Marketing. Member of the Public Assembly of the Ulyanovsk region and the Public Coordination Council of the city of Ulyanovsk. He is the Chairman of the Ulyanovsk regional branch of the People's Patriotic Union of Russia. He was awarded: the Order "For the revival of Russia. XXI Century ", a diploma "Leader of the present "International Competition" Pilar "; medal and diploma "The Best People of Russia"; a diploma and a gold medal "European quality"; " Medal of Merit". He is the head of LLC "Newtonian Society" for almost a - entrepreneur, scientist and public figure. He was born on July 23, 1945 in Ulan-Ude. From 1964 to 1970 he studied at the Kharkov Aviation Institute. After receiving a university degree, he worked in a branch of the Research Institute of Aviation Technology (JARI) in Kharkov engineer. In 1985, he was appointed head of tool maintenance machine tool plant in Ulyanovsk city, in 1993, became the director of a small business "Ether", and in 1996 founded and headed the company "Newton's society." In 2005, on the proposal of the Board of Ulyanovsk businessmen, editors of the encyclopedia "The Best People of Russia" and the Public Advisory Council for the great contribution to the society consolidation of forces in the development and prosperity of the great Russia was awarded the diploma and the medal "The Best People of Russia". According to the results of work in 2005 Vladislav Cherepennikov was included in the encyclopedia "The Best People of Russia".
