

International Summit on Past and Present Research Systems of Green Chemistry

August 25-27, 2014 Hilton Philadelphia Airport, USA

Regulatory effects of free amino acids and development on the basis of their high-purity substances infusion solutions with pathogenetic deterministic composition

Nefyodov L I, Karavay P A and Karavay N L
Grodno State Medical University, Belarus

As a practical application of the regulatory action of amino acids and their derivatives for the elimination of amino acid imbalance and metabolic therapy for specific indications proposes a methodology for the development of new multi-local amino acid mixtures according to the pathogenesis deterministic changes in their physiological concentrations.
