Pediatric dermatology: Diagnosing patients by their cover

Paul M. Berman

University of Texas Health Science Center, USA

Purpose: Maximize speed, accuracy, and comfort diagnosing and managing various skin disorders in children.

Photographs of children with various rashes and other dermatological problems will be presented prompting an interactive and evidence-based discussion of the differential diagnosis and management. Topics will include congenital, infectious, vascular and inflammatory skin disorders. As a national speaker, my lectures with this format have consistently received high ratings. I have a large repertoire of material and can adjust the content and the length at your discretion.

Biography

Paul M. Berman, MD is a pediatrician, pediatric hospitalist, and pediatric emergency physician. He is a Clinical Assistant Professor in the Department of Family and Community Medicine, University of Texas Health Science Center, San Antonio, Texas and Chief, Department of Pediatrics, St. Luke's Baptist Hospital, San Antonio, Texas.
