

30th International Conference on

Dental Science & Advanced Dentistry

May 22-23, 2017 Las Vegas, USA

Israel Ismaj

Diplomate, American Dental Association, USA

Predictable Implant prosthetics in your daily practice. What is really working in clinical dental offices.

An overview of implant dentistry that leads to their effective and predictable use. All case types from single to fully edentulous, from non guided to guided implant placement, from esthetically demanding to basically functional will be presented and discussed. What can be done, day in and day out, in all offices with a high degree of predictability and success.

Biography

Dr. Israel Ismaj has been practicing General Dentistry since 1972, and was educated in the UCLA dental program. He is an Active Member of the Academy of Osseointegration, a Member of the American Dental Association, the California Dental Association and the San Diego Dental Society. Dr. Ismaj first underwent implant dentistry training in 1985 at the University of Washington in Seattle, which was conducted by Professor Branemark. A year later, in December of 1986, Dr. Ismaj was invited by Professor Branemark to present cases that he had done during that year in his original office in Chula Vista, California. Dr. Ismaj also rehabilitated the first ever case with full implants in Chula Vista, in 1986. Since then, he has rebuilt over 5,000 implants for patients, and has given numerous implant seminars. He speaks fluent English and Spanish. He is available to offer patients complimentary consultations in order to create beautiful smiles for you and your family.
