HERBALS & TRADITIONAL MEDICINE

OCTOBER 18-20, 2017 OSAKA, JAPAN

Experience of usage Qing Kai Ling injection among 25,000 patients

Chaiwat Thepsena

Royal Thai Navy, Thailand

Qing Kai Ling is known for neuroprotective effect by relieving the damage of vascular endothelial cell as well as inhibiting the process of inflammation and also increases expression of endothelial nitric oxide synthases. Clear body heat and detoxification is another benefit effect from Qing Kai Ling. During 10 years of usage of this injection among 25,000 patients of coronary heart disease, cerebrovascular disease, chronic renal failure, respiratory tract infection and cancer patients, the results appear so fantastic. Most of the patients become better after being treated. Coronary artery stenosis and cerebral artery thrombosis patients have evaluated by CT scan which show disappear of occlusion. Only four patients become worse with hypotension but recovery after using moxibustion.
