## Inventory and conservation status of the Aromatic and Medicinal Plants in Morocco

Jalal El Oualidi, Mohamed Jamaledine, Mohamed Sghir Taleb  
University Mohammed V of Rabat, Morocco

The valorization of Aromatic and Medicinal Plants require their perfect knowledge. In Morocco, several studies have concerned these plants but no exhaustive list has been developed. Through this work we try to inventory, the most complete possible, plants used for aromatic and medicinal purposes. The results of the bibliographic research resulted in listing a total of 743 taxa belonging to 101 families and 371 genera. Among these taxa, 40 are endemic to Morocco, 104 are cultivated and 96 taxa are rare or threatened of which 17 are endemic of Morocco. Traditional knowledge and socio-economic value related to the use of these plants will be reported.
