Can kill the hepatitis B virus to the extent of 100%; prevent cirrhosis and cancer in treatment with herbal medicament

Nguyen Thi Trieu, Tran Minh Duc
Independent Physician, Vietnam

Recent studies have proved Phyllanthus Urinaria - Adenosmatis Glutinosum - Eclipta Prostrata - Ascorbic Acid combination plus Tenofovir in treatment of acute and chronic hepatitis B. Method the combination of drugs derived from chemistry and biology medicaments. To made a clean jobs for HBV - DNA in the patient's body, will to hope this is a new step of medicine, will no longer exist phrase "chronic HBV infection ". Methods of safety, therapeutic effect on expected cost savings should easily apply to everyone in the world. According to the investigation and must be called , Chronic HBV infection is an important worldwide cause of morbidity, mortality and source of potential new infections. There are an estimated 350 million carriers of HBV in the world. In China, Southeast Asia and sub-Saharan Africa, as many as 10-15% of the population are chronically infected. In North America and Northern Europe, infection and carrier rates are much lower, usually below 1%. Intermediate carrier rates of 1-5% are found in Southern Europe (e.g., Italy, Greece and Spain), parts of South and Central America, the Middle East and Japan. Persistent infection develops in over 90% of perinatally infected children and in 3-10% of people who become infected after the age of 6 years. Worldwide, it has been estimated that more than one million people die annually due to HBV-related end stage diseases such as cirrhosis and hepatocellular carcinoma.

The goal of antiviral therapy for hepatitis B is to reduce a patient's risks for progressive liver disease through prolonged suppression and eradication of HBV or related liver damage.

Biography

Tran Minh Duc and Nguyen Thi Trieu is completed us Master in Vietnam. Self-learning, research and discovery. We have published any papers in reputed journals and has been serving as collaborators the science advisory board with scientists and researchers around the world. We have certified as clinical researchers in California.
