Dental implant success and failure: What should you know before placing dental implants?

Gayda Abulshamat

King Faisal Specialist Hospital & Research Center, Saudi Arabia

Dental implant placements are increasing worldwide. The success of dental implant depends on several factors. The dentist should be familiar with all the aspects that lead to a successful implant before placing them. Dental implant success depends on different factors. Patient, surgeon, and the clinical protocol are the main factors in dental implant. Patient psychological status and systemic conditions play an important role in implant placement. Also, planning the procedure by the dentist before the surgery, taking into consideration the surgical and the prosthetic plans are crucial factors in implant success..
