

Botox and dermal fillers use in dentistry

Hani Dalati

Royal College of Surgeons, UK

This lecture will concentrate mainly on equipping the attending delegates with new ideas related to incorporating Botox and Dermal fillers into their dental practice where applicable in order to help them overcome a vast number of minor daily encountered obstacles. This will help them to improve their treatment plans and to achieve the desired/optimum results. The lecture additionally will cover other aspect such as: Patient assessment strategies, indications and contraindications to those techniques, Medico-legal aspects of incorporating those techniques into the daily practice, preparation and delivery of those materials, storage, dosage, selling strategies, management and treatment of possible complications, safety and risk issues related to Botox and Dermal Fillers and many others. In brief, this lecture objective is to enable attendees to know these practical concepts, techniques and to be familiar with the materials, techniques, and instrumentation of both aesthetic and therapeutic facial injectables - Botox and Dermal Fillers.
