Cleaning and shaping of root canal system

COURSE DESCRIPTION: Predictably successful endodontics is dependent on shaping canals, cleaning root canal systems, and three-dimensional obturation. Evidence-driven techniques will be presented to demonstrate how to sequentially shape, and safely finish root canals. This session will attempt to bring current scientific knowledge and practical application together, demonstrating the technique for cleaning and shaping the root canal system using hand and rotary instrumentation system.

At conclusion, participants should be able to:

• Safely apply current scientific knowledge to clinical cases
• Using hand and rotary instrumentation system.
• Assess the limitations of rotary instrumentation systems, avoiding common cleaning and shaping accidents.

Biography

Dr Vinay Kumar G has over 10 year’s clinical and academic experience as a specialist in Conservative and Endodontics. He received his BDS degree in dentistry in 1997 from Kuvempu University, Karnataka.
