The impact of the global regulatory agencies expectations and its impact on small and medium business units of Indian pharmaceutical industrial progress and the role of software in reaching the global regulatory expectations

Sagaram Sudhakar¹ and S.V.S.L.Sujatha²

¹Wollega University, Nikemete, Ethiopia

²Sconcord Pharmaceutical Consultance, India

Health care industries play very critical role in the people's progress, happiness and the growth of every nation. Global regulatory requirements are changing spontaneously to strengthen the security and safety of the patients and the Small and Medium Business Units (SMBU) across the globe are continuously under pressure to execute and achieve the global regulatory requirement. The gaps between SMBU and the regulatory expectations are communication, understanding and proper execution of global regulatory agencies expectations. The quality assurance, compliance and regulatory professionals must lead the situation in confidential manner to support the SMBU's Growth and to sustain the global pharmaceutical business competition.
