

4<sup>th</sup> International Summit on

# GMP, GCP & Quality Control

October 26-28, 2015 Hyderabad, India

## A review on good manufacturing practices for medicinal productions

**Divya Dhatri Kara**

Sri Indu Institute of Pharmacy, India

Good Manufacturing Practices (GMP) are a part of quality assurance which ensures that products are consistently produced, controlled and the standards are made and used according to the required standards by the marketing authorities and then authorized. GMP guidelines, hence, provide minimum requirements for pharmaceuticals, food products manufacturing. Maintaining these guidelines assure and certify that products are of high quality and do not cause any risk to the user or the consumer. Playing the biggest role, GMP stands up in the first line safety measure in any of the productions.

### Biography
