### **Electroencephalogram - electroencephalogram interchange [EEG – EEG interchange] thinking proceedings transmission**

Over preliminary avocation to experienced experimentation upon the feasibility of regional or overall transmission of Human Brain's Electromagnetic waves – as an EEG Signal configuration –to another Person's Cerebral cortex ['EEG – EEG INTERCHANGE'], But: REMOTELY –like a modulated Signal of compatible Frequency Magnitude, without implement mediation e.g. microchip, cerebral implants or skull electrodes – IN OPEN AIR and ON ANY GPS PARAMETER. Meaning Emission Interaction from Brain to Brain (B-B Interface) means Radio Antennas sensors and Satellite mediated procedures. Primary schedule runs as: EEG - graphic waves properly detected, through specific sensitive appliances are gathered to be Transmitted TO OTHER Participant's Brain. It follows a, with detectable phase difference, elaboration of those EEG - graphic Signals, because these are compatible with Human Brain's Electrophysiology. Here Not a PC but Brain Cortex is the Decoding matter. Effects are impressive and constitute cognitive communication of other's cerebral functions - Thoughts included resulting in Comprehension of them as a copied Speech Analogon/Parallele, coinciding technically to the long spoken concept of Physical Telepathy. That goes back even to the very early origination of Mental Constructions that is: to Thought and Intangible (sensed) 'Images' making of: Psychesthetism. Furthermore this Brain to Brain Transmittal comprises not only Cognitive but also sensory interpretations©. The quality of Perception and Interaction from person to person coincides with Reality in some fields while, simultaneously and at any moment, Intangible sensory and cognitive Images – Noetic forms Gestalt - are realized bilaterally: At all-time speech interaction simulates open space conversation© Psychesthetism Essence in perception and comprehension© 2016.

### **Biography**

Fagogenis Gerasimos has completed his Post-graduation from Athens University and Doctorate in Medicine. He has done his practice in Pediatrics at University Clinics of Evangelismos Hospital, Athens. In the year 1979, he got License for Medical Practice in Pediatrics and has nine medical works published.
