Rejuvenating innovation in Water-a call for all: Prospects for SELAMO's life sustaining WATER projects in Cameroon, West Africa

Xaveria Bunila LEYTAR
Selamo, Cameroon

The beginnings of ancient philosophy saw water as the arche (origin) of everything in the universe. SELAMO's motivation in water as a life sustaining resource is backed by the cliché "water is life." Following the outbreak of diseases caused by lack of portable water, SELAMO's involvement in community mobilization via water projects is becoming an increasing call for all to rejuvenate innovations in water. The problem of bad drinking water in many areas of Cameroon is increasing blowing the whistle with the increase in disease. Thus, how feasible is this call for all applicable in Cameroon is an urgent task that needs redress. Community mobilization and harnessing of resources by all and sundry is the approach of SELAMO towards making Cameroon a global village in rejuvenated innovations in water. Continual mobilization and training of locals on environmental care and good water sources is yielding fruits. Despite the success so far, this sector remains largely undeveloped with inadequate engineers to help bring life (water) to the Cameroonian population.

Biography

Born to the family of Maurice and Dora Bunila in 1991 as the last of five children attended Secrade Heart Primary School Shisong from 1995/1996 academic year and completed in 2001/2002 academic year. Here she obtained her First School Leaving Certificate. She then proceeded to St Augustine's college Nso in the academic year 2002 /2003 where she obtained her her General Certificate of Education (GCE) Ordinary Level and Advanced level respectively in the academic years 2007 and 2010. In 2011 she got admission into the Catholic University of Cameroon (CATUC) Bamenda in 2011 where she got her BSC in 2013. She worked in Saint Francis Hospital as a cashier for one year six months. She also worked in the School of Health and Medical Sciences of the Catholic University of Bamenda, Cameroon (CATUC) as an Executive Assistant. Since February 2018, she has been working at SELAMO NGO as one of the field workers doing rural mobilization on how to make good use of the resources at their disposal and harness them to better their lives.
