

12th World PEDIATRIC CONGRESS

December 13-15, 2018 Abu Dhabi, UAE

Mohamed Amin Abdelrahman Mohamed El Gohary

Burjeel Hospital, UAE

Vomiting of surgical significance

Vomiting in children is common and mostly related to medical condition. However there are surgical conditions associated with vomiting which needs to be acknowledge and diagnosed early. Bilious vomiting is an ominous symptom and needs to be taken seriously. Any baby who vomits bile should be considered as having an underlying intestinal obstruction until proved otherwise.
