Introduction for quality and Patient Safety methodology and arrangment for ESR on healthcare providers & committee

Saed Al Nobani
Enaya Hospital, UAE

Introduction: Define what is Quality? what is Saftey? what is the methoed we will use in this presentation? i will Speak about the STEEEP, and the describtion of each part of alone plus the Quality Prinicple that we describe the ESR from them

Methods: Being conducted in 2017, this qualitative study was the first of its type in KSA. Data were collected through in-depth semi-structured interviews with 45 Multidisplanary Cargivers working in different departments & Hospitals across the Kingdom. The participants were selected using a Random sampling method.Interviews were transcribed and analyzed following a qualitative content analysis approach. Written text was then coded, and themes were extracted from the data. Ethical considerations: The study was conducted with multidisplanary free informed consent and was approved by Ethics Committee of Enaya Hospital/ Enaya Medical group.

Findings: By analyzing the data, we found that disribuation for the multidispalnary over a diffrent commies over 1 year and 2 month has improved the outcome of the acheivment of the ESR by 38% as a results from the CPAHI Rounds on july 2017

Conclusion: the distrubuation for the multidisplanary over all hospital comitties can improve significantly the percentage of ESR when being changed in yearly basies with taking the consedration of the active work for this Comitties and number of members.
