Moemen Al Reefy

Awali Hospital, Bahrain

Premium IOLs

Purpose: To present all benefits & limitations of Premium IOLs & explore it's future in cataract surgery

Methods: Highlight our experiences at KING HAMAD UNIVERSITY HOSPITAL in Kingdom of Bahrain □□ between 2011 and 2015.

Results:

- Trifocals IOLs correct 95% of patients for distance achieving 6/12 or better
- 85% glasses free for near
- Residual Astigmatism of +, - 1.00D or less in 88%
- Accommodative IOLs are glasses free in 10% only.

Conclusion: Premium IOLs are significantly improved the post-operative usual outcome. Future developments of new premium IOLs designs that, provide spectacle independence & excellent visual outcome after cataract surgery.
