

Several lakh new inventions in organic, quasi-organic, inorganic, astro-organic, astro-quasi organic & astro-inorganic materials fabrication work plan practical demonstration for present and next generation

T.Prem Kumar

S.N.College, India

Worlds ultra fast method for the polymer liquid gum-other material thin film layer fabrication & fabrication of bio-material based thin film layers from earth abundant poisonous waste plants from dr.t.prem kumar active charge carrier extraction method practical work demonstration (making abundant money from nothing) mix:- worlds unknown space asteroids material powder with world wide inorganic, organic & quasi-organic materials (which leads completely new series materials patents and projects: astero-compounds) & calm valcono hills as a very big heat source for electricity production

model explanation practical artificial rain fall through ultra light weight polymer electronics model explanation (solution for total world agriculture problems & covid based economy problems). worlds largest integrated circuits (ic) & photon controlled integrated circuits (ic) fabrication through large area thin film solar cells and its revolutionary method model explanation plant scale level charged acid liquid container method transport plan model explanation for controlling next generation petrol, diesel & gas fuel lack problems and fuel based economy.
