

Brief Interview with Dr. Aladin Boriek (Editor)

Journal of Physical Chemistry & Biophysics

1. How many years have you been practicing and/or performing research?

29 years.

2. What is the research topic you are working on now?

Mechanotransduction in skeletal muscles in health and disease.

3. What makes an article top quality?

Innovation of the central idea.

4. What are the qualities you look for in an article?

Well-written and logic flow of the ideas as well as careful presentation of the experimental design.

5. Do you have any research funding (NIH or other national funding) now?

Yes.

6. When did you become an editor of OMICS Journal?

2013.

7. What is your greatest career accomplishment?

Being a tenured full professor in an elite medical school.

8. How does the research published percolate through to practitioners?

Physician scientists are a perfect example of a group that is devoted to read and translate research findings through translation research.

9. What is the purpose of serving as an editor?

To maintain the high quality of published work in my area of research.

10. Do you have any patents?

No.

11. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Not yet.

12. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?

I will try my best.

13. Do you have any trouble with OMICS Journals in the past?

None.

14. Would you recommend OMICS to your friends or colleagues?

Absolutely.

15. How do you differentiate Journal of Physical Chemistry & Biophysics with other journals in the field?

It is the only journal in the world that is focused on uncovering intermolecular forces between atoms and molecules and the dimensions of power and energy at the elementary level.
