

Brief Interview with Dr. Noha Lotfy Ibrahim

Anatomy & Physiology: Current Research

1. How many years have you been practicing and/or performing research?

Since I decided to continue my higher education studies.

2. What is the research topic you are working on now?

Molecular diagnostics of Pediatrics Hepatology.

3. What makes an article top quality?

Top quality article should be well written that expressed the idea of the author simply with no bias and supported with appropriate figures and tables.

4. What are the qualities you look for in an article?

I am looking for focusing on the main aspects, applying summary style on writing without going into unnecessary details, good project design supporting with considerable statistics, and following the scientific citation guidelines.

5. Do you have any research funding (NIH or other national funding) now?

No.

6. When did you become an editor of OMICS Journal?

Since October, 2013 .

7. How does the research published percolate through to practitioners?

It is about honor and conscience of the practitioners, it is also about responsibility towards the journal they joined.

8. What is the purpose of serving as an editor?

To help myself improving my activities regarding scientific research then helping others to find the weakness points in their manuscripts and advise them to the best way representing their works.

9. Do you have any patents?

No.

10. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Yes.

11. Do you plan to contribute any editorials or papers to OMICS Journals in the near future?

Yes.

12. Do you have any trouble with OMICS Journals in the past?

No.

13. Would you recommend OMICS Group to your friends or colleagues?

Yes, sure.

14. How do you differentiate Anatomy & Physiology: Current Research with other journals in the field?

Anatomy & Physiology: Current Research is an international Open Access, peer-reviewed, academic journal that confirmed its leadership in many areas of critical research. It has steadily been carrying out its major missions for publishing research articles, review articles, commentaries, short communications and case reports regards the field of anatomy and physiology.
