

Brief interview with Dr. Wen G Jiang

Translational Medicine

1. How many years have you been practicing and/or performing research?

I have practising general surgery since 1984 and performing research since 1989.

2. What is the research topic you are working on now?

Cancer and cancer metastasis are the key areas that I am interesting. I also have an interest in the wound healing area.

3. What makes an article top quality?

To me, I think it is the novelty of the discovery and also the potential for someone to benefit, namely the patients.

4. What are the qualities you look for in an article?

Innovation.

5. Do you have any research funding (NIH or other national funding) now?

Yes. I have a number of funding from cancer and medical charitable organisations, public funding bodies and industries in the UK.

6. When did you become an editor of OMICS Journal?

Since 2009.

7. What is your greatest career accomplishment?

Contribution to the area of cancer metastasis and initiation of a number of international research collaboratives.

8. How does the research published percolate through to practitioners?

Via public dissemination and also importantly the new products/knowledge available to the practitioners.

9. What is the purpose of serving as an editor?

Assist in publicising quality research.

10. Do you have any patents?

Yes. I have over 8 patents in the areas of cancer and wound healing.

11. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

No.

12. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?

Yes.

13. Do you have any trouble with OMICS Journals in the past?

No

14. Would you recommend OMICS to your friends or colleagues?

Yes. Already done so.
