[Conference Series](#) organizes the World Virology Congress November 23, 2021 in Rome, Italy. The milestone of the conference is to build strong networking with individuals from different countries and exchange the knowledge they have gained in the field of Virology. After all, Virology is a field that is growing steadily and has the potential value for the products in the world market. The organization provides a great chance for the experts who seek future in the field of Virology and shows various applications and possibilities from different minds.

The most exciting part of the conference covers the [scientific sessions](#), workshops and symposia. People from the industry also have a vital role to attend the conference to showcase, advertise and promote their products. Expos and Exhibitions make the conference livelier and more interactive. Highly affiliated people who attend the summit take the event into a quality international gathering platform to deliver the speech about their experience and accomplishments to the right audience. Conference Series hope this conference can outrun the complications and limitations of skin related problems by analyzing the current scenario of the field.

Previous Global Summit on Virology organized in London on October 14,15, 2019 was a successful and rewarding platform for the attendees, based on the theme Accentuating Novel Researches and Frontline Advances of Virology. The Mayor of Edinburgh- Rt Hon Lord Provost Frank Ross was pleased to be a great part of our conference and delivered the welcome speech. His presence was highly honoured for both the organization and the participants. It wouldn't have been possible to succeed without the organizing committee, speakers, delegates, YRFs and Edinburgh venue staff members, and media partners.

The scientific sessions of the conference include General Virology and Basic Science, Viral Pathogenesis, Virulence and Latency, Viruses and Diseases, Agriculture and Plant Virology, Aquatic Viral Disease, Therapeutic Approaches and Targets for Viral Infections, Veterinary Virology, Viral Immunology, Viral Hepatitis, Global Epidemiology of HIV/AIDS, STDs, & STIs, Recent Advances in Drug Discovery,

Current Focus in Virology Research, Bacterial Virology, Simian, Virology, Oral Virology, Diagnostic Virology and Molecular Analysis, New Innovations in Viral, Infections, Organ specific Cancer and Tumour virology, Agriculture and Plant Virology, Respiratory and Emerging/Re-emerging Viruses Case Studies and Reports, etc. Each session contains sub-sessions that comprise most of the topics under Virology. The research work of the speakers will come under either of these sessions to make the conference more organized and mastery. The Virology Congress 2020 extends the invitation to the highly affiliated professionals from the academic and business category and the young researchers as well to develop and build their career in the right path. The awards for oral presentations, posters and symposia mould the conference as a unique gathering for the experts across the world to provide the international forum to analyses the research results, new ideas and innovations.
