

## Awards of 12th World Congress on Chemistry and Medicinal Chemistry

Milanesa Chiara

### Awards

On the behalf of Allied Academies Conferences and Chemistry Community, it is our great pleasure to welcome all of the participants and guests to the **12th World Congress on Chemistry and Medicinal Chemistry**.

Chemistry 2020 will be the 11th successful edition cosponsored scientific conferences of our Societies. It was founded in 1994, AAC chemistry conferences have been held every year throughout the world.

The theme of the Chemistry 2021 is the "*Exploring the deeper levels of Chemistry towards a Healthier life*".

Chemistry 2021 is one of the most important gatherings for providing the chemists and chemistry practitioners with a podium. A workshop will ensure that the view of the latest methods and strategies involved in emerging findings is surpassed. It also provides you with high-quality connectivity with academic and industry-representing global experts; and can create partnerships between scientists. The research program of the conference deals with the core areas and specialist topics related to all facets and chemistry. The summit ultimately aims to broaden the possibilities and also focuses on driving new developments in the Chemical World sector.

### Organizing Committee Member Awards:

The organizing committee will make use of the various tasks to be done during the process of their handling. Committee leaders, who have a clear erudition of the event management technique, are well qualified to provide training, direction and assistance to all personnel involved in the event organization. Allied Academies will recognize the individual who expressed their support and encouragement as the best OCM during the conference. OCM should be respected or strongly affiliated, including Director, Professor, HOD, Chairpersons, CEO, CFO, MD etc. The selection of the best OCM will be made based on the participants' engagement in the respective field of research and years of experience. They must have a sufficient number of academic papers and citations and they will require more years of experience.

### Best Keynote Speaker:

Chemistry 2021 selects an appropriate keynote speaker to speak at the conference. All accepted keynote speaker proposals would qualify for the Best Keynote Speaker Award. The committee will select a number of candidates for the prize from amongst the accepted proposals. The winner will be decided at the meeting taking into consideration both the proposal and the presentation. Best keynote speaker will help increase morale, change the way they think and inspire and motivate audiences. For Keynote, the individual should be eminent or highly connected, such as Dean, Professor, HOD, Chairpersons, CEO, CFO, MD etc. The selection of the Best Keynote Speaker will be made based on the participants' involvement in the respective field of research and years of experience. Each submission is accepted based on conference theme and abstract content. The Organizing Committee must choose the approval of abstract submissions and their rejection.

### Best Oral Speaker Awards:

Chemistry 2021 claims there is appreciation of our best speaker. According to their research paper, the best speaker is chosen before the meeting. All winners are decided by a selection jury. The aim of this award is to acknowledge and recognise outstanding speakers who have achieved extraordinary eminence and success in the last years. Being an exceptional speaker means communicating a message that affects an audience. The outstanding presenter award will be granted on the basis of coordination and quality of the presentation, communication abilities of the presenter and effective use of the time. Every session is individually measured. The person should be speaker Professor, Scholar, Scientist, Entrepreneur etc.

Speaker selection shall be made on the basis of the participants' participation in the respective field of study. Depending on the content of the abstract sessions and conferences each submission is accepted. The Organizing Committee shall select the abstract submissions to be approved and rejected. Our department must follow a Quality

Assurance process on all submissions. Final approved abstract for exceptional speaker award will be considered.

### Young Research Awards:

Chemistry 2021 provides an invitation for young researchers in various fields of the conference. According to their abstract research the best participants are chosen before the conference. If you are a young innovative researcher then you should attend our conferences to learn about new ideas and science. A Judges jury chooses the best YRF. The Strongest YRF will be publicly acknowledged at the end of the meeting. A person who has registered in the student group will be awarded the Best Young Research Forum Award for the most outstanding performance. Within this group are called undergraduates, Master's and Ph.D. holders. The YRF selection will be made based on the participants' involvement in the respective research area, and each application will be accepted based on the sessions of the conference. Rejecting trivial demands. The committee will select acceptance and rejection of abstract submissions. All applications undergo qualitative inspection. YRF award for final approved abstract is considered.

### Best poster presentation Awards:

To be eligible for the award Students interested in having their posters considered for the Chemistry-2021 conference must submit an outline of their poster to the conference. All posters related to the public opinion study should be considered by the award committee if they concentrate on theory, analytical findings, analytical methodology and/or methodological techniques used in such an analysis. All posters are directly eligible for the Poster Award, and the posters will be shown on the conference site, choosing the best poster jurors. Officially announcing the winners at the closing ceremony. The winners will receive a Certificate.
