

Awareness about Phonetics and Audiology

Adrian Gracia*

University of Connecticut, USA

EDITORIAL NOTE

Phonetics & Audiology deals with hearing dysfunction, balance dysfunction, impairment in hearing, causes of delayed language development and its management in children and adults. It also deals with genetic and environmental factors responsible for hearing dysfunction and language development in individuals.

The Journal of Phonetics and Audiology is an open access, peer-reviewed international journal that publishes scientific articles related to all aspects of Audiology and Phonetics, by including audiometric tests, Tympanometry, Speech audiometry, Auditory reflex testing etc.

The previous volume 5, issue 1 various aspects were discussed by the authors from different parts of the world. In the research

article, Vishnuram B, briefly described the Genetic Knowledge among Audiologist Related to Hearing Loss [1]. Heather Ramsdell, described Phonetic Transcription of Infant Vocalizations: When is Reliability Achieved? [2].
