

Conference Announcement

Suzanan Tay

Cancer Institute, Italy

Conferenceseries welcomes you to attend the International Conference on Cellular Therapies, Cancer and Genetic Engineering during November 15-16, 2021 at Paris, France. We cordially invite all the participants from all over the world who are interested in sharing their knowledge and research in the area of Cellular Therapies & Genetic Engineering. The theme of International Conference on Cellular Therapies, Cancer and Genetic Engineering is “Latest Advancements in Cellular Therapies & Genetics Engineering” which provides a unique way to present the evidences on latest advancements and researches with a holistic approach to different areas of interest. The conference tracks are designed in such a way to cover all the areas of researches involved with Cell and Gene therapy and their impacts on human health. The main aim of this conference is to provide a platform to all the Scientists, Doctors, Medical professionals and Business delegates who will undoubtedly enhance the conference by giving their views regarding latest advancements to all the attendees.

Cell medical aid and Molecular medication Conference is to elevate the information, awareness, and education on cell medical aid, factor medical aid, molecular medication and vegetative cell analysis resulting in the invention of molecular therapies that aids to alleviate the human diseases because it is that the most vital rising technology within the eyes of medical, biotechnology, prescription drugs and academe. This two-day Cell medical aid and Molecular medication Event can address key problems regarding cell medical aid, factor medical aid and molecular medication within the broader context of cellular and inherited disorder. Organized around daily themes, this conference focuses on moving from gift information to future solutions so impartation the information growth and awareness among folks.

About Organizer

Conference Series LLC Ltd. Organises 300+ International Conferences Every Year across Europe, USA and Asia with support from 1000 more scientific Societies and Publishes 400+ Open access journals which contains over 30000 eminent personalities, reputed scientists as Editorial Board Members. Now it is the time for the International Conference on Cellular Therapies, Cancer and Stem Cells and Bio Medical Engineering during April 21-22, 2021 at Berlin, Germany.

Target Audience

- Cell Therapy Scientists, Researchers and Students
- Molecular Medicine Scientists, Researchers and Students
- Gene Therapy Scientists, Researchers and Students
- Biotechnologists
- Immunologists
- Health-care professionals
- Cell and Gene therapy Faculties
- Cell and Gene Therapy Associations and Societies
- Universities and College students

Allied health professionals in the fields of cell and gene therapy, haematology, oncology, neurology, family medicine and internal medicine.

- Stem Cell Students, Scientists
- Stem Cell Researchers and Faculty
- Stem Cell Associations and Societies
- Business Entrepreneurs
- Training Institutes
- Software developing companies

This conference also includes Symposium, Key note presentations, Oral presentations, B2B meetings, Poster presentations and Exhibitions. Moreover, Cellular Therapies, Cancer, Stem Cells and Bio Medical Engineering 2021 welcomes international exhibition from corporate sectors to advertise their products/services from recent advancements that shall be placed in the exhibition area throughout the conference.
