

## Current Pandemic Situation around the World (COVID-19)

Dayanidhi Raman\*

Department of Cancer Biology, Vanderbilt University Medical Center, Nashville, USA

### EDITORIAL NOTE

As we are aware of this pandemic outbreak of COVID-19, the people across the globe has to be aware that it is been caused by SARS-CoV-2 coronavirus. SARS-CoV-2 is highly contagious and often leads to severe viral pneumonia with respiratory failure and death in the elderly and subjects with pre-existing conditions. The fatal rate for COVID-19 is growing exponentially in many countries like Italy, Spain, South Korea, China, USA with the doubling time. The coronavirus outbreak came to light on December 31, 2019 when China informed the World Health Organization of a cluster of cases of pneumonia of an unknown cause in Wuhan City in Hubei Province. Subsequently the disease spread to more Provinces in China, and to the rest of the world. The WHO has now declared it a pandemic. The virus has been named SARS-CoV-2 and the disease is now called COVID-19. WHO (World Health Organization) has come up with a plan to maintain the awareness among the people about the happenings across the globe. This strategic preparedness and response plan outlines the public health measures that the international community stands ready to provide to support all countries to prepare for and respond to COVID-19. The document takes what we have learned so far about the virus and translates that knowledge into strategic action that can guide the efforts of all national and international partners when developing context-specific national and regional operational plans. WHO is working 24/7 to analyses data, provide advice, coordinate with partners, help countries prepare, increase supplies and manage expert networks. The precautions are needed to be taken by everyone in order to protect themselves and others around them. To prevent the spread of COVID-19:

- Cleaning your hands with soap and water or alcohol based hand rub often.
- Avoid touching your eyes, nose or mouth. Maintaining a safe distance from others who is coughing and sneezing.
- Staying home if unwell.
- In case, if you have a fever, cough and difficulty in breathing, seek medical attention and call the local health authority. The journal should publish articles related to.
- Advanced techniques that is being used for the treatment of skin diseases globally.

Journal of Tumor Research aims to publish the most exciting research information with respect to tumor diagnostics. Secondly, to provide a rapid and quick review process to facilitate publication so that information is freely available for research, teaching and reference purposes. It basically aims at Medical and Clinical practitioners, institutions, researchers, students and academicians that are responsible for disseminating messages related tumor to the media and the general public. Journal of Tumor Research is an open access journal that gives a worldwide audience larger than that of any subscription-based journal in Longdom Publishing SL field, no matter how prestigious or popular, and probably increases the visibility and impact of published work. JTDR is a Longdom publisher with one thousand+conferences in 2019, across the USA, Europe & Asia. In 2019, the articles were published with rapid peer-review process and we are expecting to do so in future. I appreciate all the Editors and reviewers of the Journal who has stepped up and made the journal a success. I hope this support will be continued by all of them and maintain the standard of the Journal.
