

## Editor Note: Medical & Surgical Urology

Colin Collins\*

*Professor, Department of Urologic Sciences, Vancouver Prostate Centre, Canada*

### EDITOR NOTE

I would like to introduce Medical & Surgical Urology Journal to all the authors, readers and my fellow colleagues, which is an open access platform for the scholars, researchers, doctors and students of urology and surgery with a view to publish the most trending and innovative researches.

It is a very exciting journey in the year 2020. All the articles in Volume 9 published smoothly well within the time and we are coming with the next issue in February, 2021. The articles we received for our previous issue were highly informative in urology science which encourages us to work more hard for our coming issues. The sole aim of Medical & Surgical Urology Journal is to bring out the best researches and updates in urology field and we thrive for it in each single issue.

The COVID-19 pandemic has impacted every sector badly. The objectives of Medical & Surgical Urology Journal are always to encourage the authors to produce high quality researches on various subjects like Endourology, Genitourinary Disorders, Laparoscopy, Pediatric Urology, Pelvic Medicine, Prostatic Hyperplasia, Reconstructive Surgery, Reconstructive Urology,

Urinary Tract Infections, Urogynecology, Urologic Oncology, etc.

We have published 15 high-quality articles in the previous issue and hope to continue the same trend in all the upcoming issues. The next issue will be released in February, 2021 with some exciting research, review and case series articles so I would expect from all our readers to make it a success as well like they have done for all our previous issues.

I take this opportunity to thank and express my gratitude to all the editors, reviewers, authors and readers for their association with us over the years and their support to bring yet another successful issue release. And I am hoping for their continuous support in the coming years as well.

I would also like to thank all my colleagues in the Editorial board for their hard work and support in bringing out the best from Medical & Surgical Urology Journal throughout its journey.
