### Welcome to Drug Metabolism and Toxicology

On behalf of the editorial board members, welcome to the *Drug Metabolism and Toxicology*. This journal has been recently established which publishes original research articles, reviews and technical notes in the area of drug disposition and toxicity. The *Drug Metabolism and Toxicology* is an Open Access Journal and publishes full text research articles which are freely accessible via Internet worldwide to the scientific community. Interested readers can read, download, and print any Open Access article without any hassle and at no cost. Also, there is no subscription fee for the *Drug Metabolism and Toxicology*.

This journal accepts original research and review papers as well as letters in all areas of drug metabolism and toxicity. A manuscript submitted to the journal for publication should be original. It should not have been previously published and should not be under consideration for publication elsewhere. All published research articles in this journal have undergone rigorous process of peer review, based on initial editor screening and anonymous refereeing process by at least two or more expert reviewers on the subject. The journal publishes online and articles are available rapidly after acceptance. The

published articles are expected to receive high citations as the journal develops and reaches prominence in the field. Our aim is to encourage scientists to publish their theoretical and experimental details, while interacting and exchanging valuable information with each other. If we judge by willingness of the authors to submit manuscripts, it seems, *Drug Metabolism and Toxicology* would attract good quality papers from scientists all across the globe. It will be our great progress in accomplishing the goal of making *Drug Metabolism and Toxicology* as a well respected scholarly journal known among scientific community for publishing good quality original research. However, none of this would be possible without the contribution of dedicated and qualified editorial staff along with a large number of referees who will ensure screening of good quality work.

I expect that *Drug Metabolism and Toxicology* will attract manuscripts of the highest quality, which will be of the greatest possible benefit to readers. We are looking forward to receive your submissions. Please do not hesitate to contact the Editor, if you would like to discuss the suitability of your contribution to *Drug Metabolism and Toxicology*.
