

About the Journal

Nanomedicine is an application of nanotechnology which made its debut with greatly increased possibilities in the field of medicine. Nanomedicine desires to deliver research tools and clinically reformative devices in the near future.

Journal of Nanomedicine & Biotherapeutic Discovery is a scholarly open access journal publishing articles amalgamating broad range of fields of novel nano-medicine field with life sciences. Nanomedicine & Biotherapeutic Discovery is an international, peer-reviewed journal providing an opportunity to researchers and scientist to explore the advanced and latest research developments in the field of nanoscience & nanotechnology.

This is the best academic journal which focuses on the use nanotechnology in diagnostics and therapeutics; pharmacodynamics and pharmacokinetics of nanomedicine, drug delivery systems throughout the biomedical field, biotherapies used in diseases treatment including immune system-targeted therapies, hormonal therapies to the most advanced gene therapy and DNA repair enzyme inhibitor therapy. The journal also includes the nanoparticles, bioavailability, biodistribution of nanomedicines; delivery; imaging; diagnostics; improved therapeutics; innovative biomaterials; regenerative medicine; public health; toxicology; point of care monitoring; nutrition; nanomedical devices; prosthetics; biomimetics and bioinformatics.

The journal includes a wide range of fields in its discipline to create a platform for the authors to make their contribution towards the journal and the editorial office promises a peer review process for the submitted manuscripts for the quality of publishing. Biotherapeutics journals impact factors is mainly calculated based on the number of articles that undergo single blind peer review process by competent Editorial Board so as to ensure excellence, essence of the work and number of citations received for the same published articles.

The journal is using Editorial Manager System for quality peer review process. Editorial Manager is an online manuscript submission, review and tracking systems. Review processing is performed by the editorial board members of Journal of Nanomedicine & Biotherapeutic Discovery or outside experts; at least two independent reviewers approval followed by editor approval is required for acceptance of any citable manuscript. Authors may submit manuscripts and track their progress through the system, hopefully to publication. Reviewers can download manuscripts and submit their opinions to the editor. Editors can manage the whole submission/review/revise/publish process.

Why Special Issue

This special issue has been introduced to recognize those researchers who are with us from the starting of the Conference and kept their believe with us regarding the quality of the conference and the publication. Their continuous support make the Conference as well as the supporting journal to the conference successful and recognized by the international experts.

Here in honor to those supporters, those speakers, those submitters, those researchers we are releasing the special issue with the abstracts accepted for the conference, full length articles submitted to the conference and with the short communication submitted to the conference.
