

Editorial Note for Journal of Physical Chemistry & Biophysics

Sudha M*

Vivekavardhini College, M Sc Organic Chemistry, Kothagudem, India

INTRODUCTION

We are proud to announce Journal of Physical Chemistry & Biophysics have successfully released nine volumes and is gearing up for its next volume. The journal is a rapid peer reviewed journal physical chemistry journal which deals with the intermolecular forces between atoms and molecules and the dimensions of power and energy at the elementary level. The various forms of research also involve the rate of a reaction and the energy and by-products of reaction including entropy and kinetics. Journal of Physical Chemistry & Biophysics focused on the areas such as Physical Chemistry, Biophysics, Physical Properties, Particle physics, Medical physics, Applied physics, Crystal Structure, Fusion Energy, Magnetotactic Bacteria, Modulus of Elasticity, Physics Planck's Law, Plane mirror, Radiology, Reflective Practice, Room temperature, Slide Valve, Sliding Mode Control.

The Journal Impact factor is 0.7. All published articles of this journal are included in the indexing and abstracting coverage of Index Copernicus, Google Scholar, RefSeek, Geneva Foundation for Medical Education and Research, Jamia Hamdard University, EBSCO A-Z, Genamics, Scholarsteer, Publons, Online Access to Research in the Environment, CAS Source Index. We also have a good citation for our journal and it's content. The journal statics can be viewed here Google Analytics of Physical Chemistry <https://www.longdom.org/physical-chemistry-biophysics/advertising.html>.

During the calendar year 2019, JPCB received a total of 35 papers, out of which 24 articles (70%) were rejected in the preliminary screening due to plagiarism or being out of the format and peer review process. During 2019 around 11 articles were subjected for publication after they are accepted in the peer review process. Globally our articles have been accessed by the many research scientists and also cited.

The Journals has some good articles on Biopolymers and Bioplastics, Study of the Conjugation of Ethyl Benzene Dehydrogenation to Styrene, Nuclear magnetic ions, a short communication on Deuteron and many more which you can site at <https://www.longdom.org/physical-chemistry-biophysics/archive.html>

I take this opportunity to acknowledge the contribution of Editor-in-Chiefs during the final editing of articles published and the support rendered by the editorial assistants in bringing out issues on time. I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of JPCB, and look forward to their unrelenting support towards the journal.

We reach out to researchers in different parts of the world through social media platforms such as twitter, LinkedIn and Facebook so that our journal has an information that is diverse. The journal has a good following on social media and is supported by some good institutes.
