

Editorial Note for Orthopedic and Muscular System: Current Research

Britney Taylor*

Managing Editor, Orthopedic and Muscular System: Current Research, Barcelona, Spain

EDITORIAL NOTE

Orthopedic is a relating branch of medicine dealing with the correction of deformities of bones or muscles. I am pleased to mention that during the year 2020, all issues of volume 9 were published online well within the time. Orthopedic & Muscular System: Current Research is a scientific open access journal that specifies and describes the development activities conducted in the field of arthritis and joint pain research. This journal encompasses the study of spine injuries and cytoskeleton analysis of the uncertain behavior of joints or bones which will facilitate the specific injury diagnosis. The specific medical branch deals with this important subject is orthopedics which studies various bone types, types of muscles, tendons, ligaments and all associated systems. A number of important aspects are under the scope of this subject such as bone density, diseases associated with bone, such as bone cancer, bone marrow replacement or transplantation, injury, other musculoskeletal issues, orthopedic surgery, osteoporosis and related treatment regimes, foot and ankle surgery, medicine for osteoporosis, studies associated with Periacetabular Osteotomy, Osteoarthritis, Orthopedic Trauma, Arthritis, musculoskeletal system, Orthopedic oncology, Surgical sports medicine, Spine

surgery, Pediatric orthopedics, Laminectomy, Orthopedic nursing, orthopedic implants etc.

During the calendar year 2020, Journal of Orthopedic and Muscular System: Current Research released a total of 3 issues. During the calendar year 2020, a total of 10 Editors, 4 Reviewers joined the board of OMCR and contributed their invaluable services towards contribution as well as the publication of articles.

Journal of Orthopedic and Muscular System: Current Research aims to assemble and reserve precise, specific, detailed data on neoplasm. The journal aims to Publish Research, Review, Short Communication, Case Studies related to cancer. Thus, providing the readers appropriate information through free access and promote the awareness among people.

The wide scope of the journal will aid in contributing a great measure of scientific information related to the advances in cancer medicine.

Once again, we would like to use this open door to thank you for the exertion and aptitude that you add to exploring, without which it is difficult to maintain the high standards of peer reviewed journals.
