

Editorial Note on Clinical Toxicology

Maryam Akhgari*

Legal Medicine Organization, Head of Forensic Toxicology Laboratory, Iran

EDITORIAL NOTE

This volume remarks 10th Volume of our prestigious journal of Clinical Toxicology and we are glad that we have published all the issues in our 10th volume on time and we are ready to publish the fourth issue in our 10th volume.

We are proud to have such eminent scholars in our Editorial Council which is composed of professors from world-leading toxicology and pharmacology departments and I would like to thank them all for all their efforts in publishing high quality articles online.

Now-a-days as technology plays a vital role and as our journal is open access online publication journal we are disseminating more advancements regarding toxicity. We are publishing novel advancements and innovations in the form of research, review, commentary, case studies, case reports, mini reviews and also as image articles. Now we have advanced and now onwards we are accepting video articles too for publishing in our upcoming issue. As the journal is open access, it is accessible to all the researchers throughout the globe and thus responsible for the world-wide readership. We are honoured to release our monthly readership metrics of our journal and they are accessible to everyone in our homepage stating readership metrics.

Even in this pandemic situation our journal works endlessly to publish high quality articles by providing fast-track peer review process with the help of high qualified editors and reviewers along with the publishers. The Journal follows a tough peer review process for each article submitted for consideration to ensure the quality of the publication. Double blinded peer review process is followed by the journal. The articles are accepted for publication only after receiving consent from two independent reviewers followed by Editors permission.

Our journal is having ISSN (International Standard Serial Number) of 2161-0495 and Index Copernicus Value: 84.15. We are indexed in Index Copernicus, Google Scholar, Sherpa Romeo, Open J Gate, Genamics Journal Seek, Journal TOCs, China National Knowledge Infrastructure (CNKI), Global Online Research in Agriculture (AGORA), RefSeek, Hamdard University, EBSCO A-Z, OCLC- WorldCat, Publons, Geneva Foundation for Medical Education and Research.

As we provide fast-track peer review process, the manuscript will be reviewed within 10-14 days after acceptance from preliminary quality check. The preliminary quality check helps the journal ensures the quality of journal by checking the plagiarism content of the manuscript. The journal is mainly based on these two key points: Firstly to disseminate the novel researches including the advancements and newly observed case reports. Secondly to provide fast track peer review process to the authors.

We are very flexible in our editorial policies. We welcome articles from other countries. We want to make our journal the platform of the international comparative discussion on different legal subjects regardless of nationality. Our scope is not limited. As all our readers, editors, we have online tracking system which is easily accessible to editors, reviewers as well as publishers for easy tracking of manuscript status.

I would like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of JCT and look forward to their unrelenting support to bring out the volume 10 of JCT in scheduled time.
