### Abstract

Donald Trump perhaps is the first president in the history of the United States who despite of accompanying with the policies of the Republican Party, has been seriously criticized and so controversial by some of them. But it should be noticed that US is the same country and its supporters are the same people, but the only thing has been changed and so make Donald Trump controversy from the moment of the election to the day that lasts less than a year, and someone ask his impeachment, is the change of world discipline and regional and trans regional evolutions. Therefore, there are two solutions, either the United States must continue with obstinacy of Trump and then end up with him after five years of international struggles even war in the next presidential election, and replaced him with the first pro-democracy woman after 231 years in the history of the United States, which does not have any political background like Trump, or it can end up this eight years process by relying on null power and Donald Trump's taboo breakdown from Apartheid to regional violence.

**Keywords:** Donald Trump, Abraham Lincoln, Adolf Hitler, Apartheid, Faulty gene, George Washington

### Who is Trump?

Trump was born on 14 June, 1946 in Queens, New York city in a religious family of the Presbyterian of the Protestant Christian Church. He is the fourth of five children born on Mary Ann and Frederick Trump married in 1936. His sister, Maryanne Trump Barry is an attorney and an inactive Senior United States Circuit Judge of the United States Court of Appeals for the Third Circuit. His mother is Scottish immigrant and was born on the Louis Island in the west coast of Scotland. Trump's paternal grandfathers were German-American immigrants. His grandfather, Friedrich Dormpoff, was a successful restaurant owner in the Klondike during gold rush and then changed his name to English name. In his book "The art of Deal", published in the 1987, Trump falsely claimed, Friedrich Dormpoff is Swedish. Later, he accepted his German descent and He served as the grand marshal of the annual German-American Steuben Parade in 1999.

Trump entered Fordham University in Bronx. After two years, he transferred to Wharton School of University of Pennsylvania, because it offered one of the few real-estate studies departments in United States academia at that time. And by inspiration of Jewish gene he was led to this course [3]. He was graduated in 1968 with a Bachelor of Science degree in economics. Trump married Czech model Ivana Zelníčková, on April 7, 1977. They had three children: Donald Jr. Ivanka and Eric. Ivanka became a naturalized United States citizen in 1988, while Trump was on his side. The couple divorced in 1991.

Maples and Trump were married two months after the birth of their daughter Tiffany in 1993. They were divorced in 1999. In 1998, Trump met Slovene model Melania Knauss and married in Palm Beach, Florida in 2005. In 2006, Melania acquired United States citizenship and she gave birth to their son Barron, fifth's Trump child in that year.

Trump said that after graduating from university, his fortune was 200 thousands \$. He started his career at his father's real estate company, Elizabeth Trump and Son, which focused on middle-class rental housing in the, Brooklyn, New York City, Queens and New York Staten Island. One of the first projects of Trump during his

### Introduction

Over the past few decades, United States has been able to play a significant role in the political world as a regional and transatlantic power in the international arena, and has been very effective in many conflicts in the political world, Politics. Therefore, study of US presidential election process has always been interesting to international community, to the extent that US presidential elections to be pursued with enthusiasm by all countries and even the people of the world, and in the last US presidential election, the whole world is impatiently waiting to see election which makes involvement the world by his decisions in the field of international and global relations [1]. For this reason, all the people of the world persuade US president policies confronting with different global problems.

An interesting point in the recent US election is election of a person who has not only no significant and efficient political history in his work records, but also, all the world know him as an economical and wealthy Hollywood man. Although, his financial ability help him and his associates to enter White House, but undoubtedly for staying in the White House, they need some variables more than financial ability, and at the best some of these conditions can be met with material costs.

An Iranian proverb says: "April and May the keys of the year". It means by the first events and behaviors, we can guess what is going to happen in the future. This proverb is true for US new president. Although, there is another Iranian proverb "All is well that ends well". So there may be some changes placed, and it is better to focus on the final work and despite of inappropriate condition of conclusion, to evaluate all of our works [2].

undergraduate study was revitalizing the foreclosed Swifton apartment complex in Cincinnati, Ohio, his father bought it about 5.7 million \$ in 1962.

In 1971, Trump moved to Manhattan, where he was involved in larger construction projects and applied attractive architectural design for acquiring public encouragement. In the beginning of 1973, for the first time, Trump drew wider attention when the US Justice Department contended him for breaking Housing Bill accused of exploiting 39 buildings. On the contrary, Trump accused US Justice Department of targeting his company for its large size and forces it to lease welfare recipients [4]. In 1975, he made compromise on the charges and said he is satisfied with the agreement because his organization is not forced to afford welfare aids to recipients as long as are not qualified like other tenants

Also in 1988, Trump acquired casino, the Taj Mahal by making a complex transaction with Merv Griffin as well as Resorts International increased his debts. By 1989, Trump had failed to pay off their debts. Although, he guaranteed more loans and postponed profits, but increasing debt until 1991, Trump had gone bankrupt. Banks and bondholders had lost hundreds of millions of dollars, but by managing debt structure, they could rescue to somewhat and finally on the 5 October of 1991, the Taj Mahal went through a prepackaged bankruptcy, resulting in Trump giving a 50 percent stake in the business to its bondholders in exchange for lowered interest rates and a longer payoff schedule. He also sold his financially difficult air lines, selling his 282 - foot boat. In late 1990's, witnessing resurgence in the financial situation of Trump, as Trump's father died in 1999, he divided the estimated \$300 million equally among his four surviving children.

In 2001, Trump completed a residential 72 stories Trump World Tower, which was across from the headquarters of the United Nations. He began construction on Trump Place, a multi-building development along the Hudson River. Trump thereafter owned commercial space in that 44-story mixed-use tower (hotel and condominium) in the Columbus square [5]. Meanwhile, he is owner of several millions of square feet of the best real estate of Manhattan.

Trump Tower is a 58-story, mixed-use skyscraper located at 725 Fifth Avenue in Midtown Manhattan, New York City constructed by Equitable Life Insurance Company and designed by De Scutt, architect of Soeek Hayden Kanl Company. Nowadays, Trump is the only owner of this tower. His house, penthouse as well as Supervisory offices located in this tower. Also, the towers built in Turkey, Baku, Azerbaijan and Istanbul, by Trump organization is also known as Trump Tower.

### Frankness is the Key to Enter White House

Perhaps the most important factor in Donald's success in the US presidential election was to speak out clearly and avoid double-sided dialogue between politicians. This character makes him as Republican final candidates despite of any political and party background. This question is raised "which of his frank speeches make him winning the electoral vote?"

Obviously, it can refer to his attack to US President Barak Hussein Obama, from his critique to foreign policy to domestic policy. Of course, these challenges and attacks focused on the traditional Democratic rivals seemed quite natural. When, Donald courageously attacked Obama background, history and family, US public opinion inferred that attack and challenge to the colorists and it can be this inference was true. In the election campaign, Donald did not clearly

deny or accept questions rose about racist issues and somehow announced his clear support for the racism issue in the United States. However, the previous presidents also did, but apparently gestured against racism and they behaved differently [6]. By avoiding any dual behavior, Trump had a fairly clear position on this matter and practically announced he didn't need 78 million votes of American colored people.

Another Donald challenge was deport of legal and illegal immigration in the US, which many believed it was political self-defeating and early political good bye to the presidential election, but in fact, not only it was not political self-defeating, but also it could attract final vote for winning the election, because he was completely aware of situation and controlled all the matters statistically and psychologically. Perhaps attacking more than 53 million Latin - immigrant in the US and near 10 million illegal Latin immigrants requires encouragement. As United States is the second country with the most Latin language speaking population about 62 million people after Mexico with the population of 127 million people, Trump bravely demand deporting them and it could be said this challenge was not risk but it was an effective and decisive action for winning the election.

Trumps accuse to sexual assault and compliant and spreading his offensive talk about 50 percent of the US women population was another controversial event which became problematic in the presidential election. This event either deliberately or inadvertently redoubled his winning game and he gained best possible profit of these events. Instead of dealing with these complaints by secretly paying financial compensation, Trump bravely stood and became a symbol of Americans truthfulness, accountability and willing. Also, he implicitly announced to the elite community and US people, he is severely opposite of harlot women and does not need their vote to reach power.

Meanwhile, he took stand in particular to the electoral politicians that firstly did not need to vote of colorful people, immigrants and undesirable people especially harlots and inveterate to get presidency and enter White House. While they make up about 130 million people in the United States, but they do not have an effective role in shaping electoral votes.

Donald lost votes near 43 percent of the US population of 320 million, who had not affective role in the politics and were not considered as effective population, except people who had similar opinion with him. By this action, he showed indirectly to voter elites that with the precise calculations done, I could easily reach the power by dismissing this class of community and gaining other party and nonparty elites [7]. In fact, he did not pay attention to popular votes. He smartly declared discussion that not only was pleasing to the elites and votes owners, but also, it was not understandable and distinguishable for many of citizens.

On the other hand, by taking this action, Trump achieved decisive vote and became winner of elections or he failed with little difference. Perhaps, his braveness and frankness was the most important factor in his success, as it was clear his intention for presidency was to try his chance. It should be noted that Trumps personality is two dimensional and hard. And now it can be said that his votes are reliable and firm because he was elected considering his publicity, controversial and decisive speaks.

## Forty-Fifth President and Fifth Minority

Donald is the fifth president who received 3 million votes less from US population and could end the presidential campaign in his favor. Before him, presidents like John Quinz Adams, Robert Rotherford Hayes, Benjamin Harrison and George W. Bush could not win the majority of general vote, but won the presidency by acquiring more electoral votes. It is interesting that until now, these five minority presidents were Republican Party. This party is accused of being violent during many years.

Another significant point that played a significant role in the recent US elections, was getting out some popular group from passivity mode and their not concurrent according to the past centuries, as earlier American compromise with this discrimination in the presidency elections, in a way that everyone was deprived of the right to vote and should be voted to the so called elites and electoral colleges who decide for the future of the country and elect the president directly [8]. So general citizen have not important role, that is, as there are not hard laws that force citizens to participate, there was no possibility for anyone to be interested in participating in the elections. However, with the absence of public, there were still no disruptions to the presidential election, as the Electoral College elect president, even against views of those who introduced the elite as their representative!

Hence, regarding lack of direct role of people and citizens in the presidential elections, we witnessed opponents in the US streets, although with a political and logical look, we find there is obvious weakness in these elections method designed 225 years ago. First, this method comes back to two centuries ago, and it has been made little modification confronting with problem. Most of reforms were made in the first few decades, and nearly 200 years ago, the electoral law remains intact and if there have been some minor changes, it is because of situation and solving the presidential problems.

For the US elections, we could only say that it is contradict with the spirit and essence of public democracy. Perhaps this system was effective and successful for the last years, but everyone has the right to vote and right to choose, and so leads to the street protests [9]. On the other hand, this system of election based on the Electoral College, has the possibility of high political corruption because the colleges are somewhat well known and there is possibly of changing their view about presidential candidate as directly and indirectly in different subjects, as according to old proverb : Conscience and human values are in two ways apart from the political balance and perhaps the best way is going out of crisis and reforming US election law and systems!

Another very important aspect in the US presidential election is that this law and election system and many of country's fundamental laws determines laws frameworks, all of them established at the time slavery system and racial segregation was a part of US culture [10]. So this is usual, when the nineteen US Jewish President Abraham Lincoln can hardly only partly abolish slavery and racial segregation, many of laws and subcultures have been remained without any change, although, Lincoln tried to make a big move and became as an American legend by virtue of his opponents with the slavery system and racial segregation, but today his heritage changed remarkably so this traditional gap has been remained.

## Nazism Germany Gene or Republican American

One of the family origins of Trump goes back to Nazism Germany and also Adolf Hitler. Maybe many of his people defend him as having

racism gene and Nazism of Germans but at that time Adolf Hitler had serious problem with Jewish while at the same time ancestry of Trump back to Jew too. Donald Trump in fact must hate discrimination and racism for any reason such as color or religion nationality and language. The reason of this tacit support from apartheid in USA is not new meditation or beaten gene but it is following constitution rules of USA.

In fact racism in USA is old wound that become very obvious at the first year of the presidential election because of voters and confidence between Trump and his followers and caused violence in some places of USA [11]. To the extent that anti-racism group bring down thousand and five hundred and three statues of American legend that were slavery figures and part of USA history before cancellation of slavery system. Because of this, government transfer some of these statues, were often in the universities, to the historical museum so that preventing continue of this violate behavior.

## Racism Spilt, Active Volcano

Without hesitate, racism will be one of the most important internal problems of USA for Trump but however he will manage this crisis very good and active spilt. Although he tries to prevent becoming active and eruption of this volcanoes in his country but this internal behavior and accident in first year of his presidency is nothing except other crisis creation of other political groups and even some of inside worriers because USA is same county and like past president will move according to base of structure and framework, so it is very obvious that Trump is innocent in this situation.

We should not forget before Trump, USA elected first black Democratic Party (colored) president which this cause working differences between these two to be very much. It is obvious that expectation of people also perches in this path and his street violent and conflict was predictable and this disagreement cannot be very important problem for him.

## Trump Iron Fist for Muslims

The most important of Donald action after becoming most powerful person in White House was his famous immigration executive orders. Because clearly despite many opposition of political American, Trump severely restricted entrance of some country would be insecurity for USA base of his idea and his consultant's cabinet according to internal ground rule [12]. At beginning not only American but also world society show their reaction versus his behavior but after a period of time that radical Islamic and Takfiris such as ISIS in Iraq and Syria defeated but many of their survivors follow their countries path and with regard to their ferity, mostly European countries burned on their fury of anger. As everyday will be witness of different terrorist operation in all over Green continent. From England to France, Belgium, Spain, Finland and Germany struggle with these Takfiris extremists.

Maybe the main reason of problem that European everyday burned in fury of anger of Islamic radical and Takfiris of pretended new Muslim is their return authorization to land of countries which fiercely fitting with ISIS and other group of terrorist and by signing famous immigration order Donald Trump in fact protects his government and people of USA from radical Takfiris. Although adding name of these countries and especially IRAN is an inimically movement and somehow poses unilateral (independent) sanction also very cruelly but the essence of this action already worked very well against the

preventing of terrorist action. Although doing that shows kind of weakness and clearing element of main problem [13-17].

Of course Donald Trump will not be only focus on the immigrating executive rule and we should expect more hard action against Muslim by him. Recently, Trump announced as governors confronted with Iron fist against USA civil war and failed it in the past, today we also should use this iron fist against Muslim in order not witness of the revengeful movements of radical Islamists and Takfiris. Maybe this literature seems idealistic and illogical but we should see that what Donald will be doing in real space.

### Where are Going Fighting Robots?

May be Donald's most important action in the first year of his presidency is to contract heavy sale of military equipment and advanced weapons to Saudis in Middle East. This contraction and sale of weapons has been unprecedented in human history, and it can be taken into account as a huge hazard [18]. And prior to have economical looking at this issue, we must keep in mind that this movement will disrupt regional balance with the presence of regional superpower such as Islamic Republic of Iran.

However, in recent years, the two countries have entered intensely cold war, where even the embassies of both countries were closed. It is obvious that selling such weapons to their regional allies bring many questions? It is also in the situation where the fire of tension with its long-standing enemy" the Islamic Republic of Iran "is about to reach its peak! In other hand, the cold war between two countries not only have root in their ideology, religion and believes, but also in fact has combined with history of two counties. As, both countries have been waiting for this confrontation on the basis of their own religion teachings for many years. Though, so far political men of both sides resorted to continence as well as rationalism and have avoided any kind of provocative movement.

But what really means "offering these huge US\$ 460 billion American weapons by Donald to one regional country"? Doubtlessly, this military equipment such as advanced hunter warheads, fighter jets, bombers, all kind of heavy and light weight battleships and very advanced cannot be only for purpose of financing costs [19-23]. Since some of the fighting equipment such as warrior robots that their manufacturing and preparing has been banned by United Nations, can discover in Saudi Arabia's shopping list according to unofficial news.

Warrior robots are intelligent robots that have been designed and made as light, semi- heavy and heavy weight. These killer machines can ship large amount of ordnance. Also, due to their high artificial intelligence, they play a very disruptive role in the battle field. While this robot will bring down rate of people fatality to zero, but will penetrate to other various parts of urban warfare.

Undoubtedly, the presence of Trump in the USA presidential seat and his very accurate and accountable behaviors unlike common opinion which seems shallow and insane, it announce a huge transition in the global. Now this change can bring perfect warfare against one of the three countries which for years had old cold war with USA namely North Korea, Venezuela and Iran. Also, it may be the strange action in internal arena and salvation of declining American economy. But whatever it is, with regard to Donald electoral slogans and his complex multidimensional personality, he will adopt best exploitation for his own country whether military attack or hard economic sanction [24].

### Make America Great Again

Donald Trump with slogans of "make America great again" start his election campaign and by announcing his programs, he declared easily and clearly to all American that would like to overrule political expediency circumstances and only focus on his own country interest. Though politician and experts believe that, Donald made stupid mistake from beginning of his presidency until now, but with expert and logical glance without prejudice and feeling we understand that Donald make best possible decision for his country.

Since the election of Trump in the United States, we are witnessing a political earthquake every day. An earthquake may shake the whole world and bring material and spiritual damages to it. But it is beneficial for USA. One of the benefited economic actions of Trump for USA was coming out from some agreement and contracts and international treaties. For instance he got out from environmental Paris agreements in quick and decisive action and take out financial burden of this contract from USA [25]. Though most greenhouse gases produce in USA and most hurt to earth atmosphere come from these greenhouse gases.

Tran's pacific treaty is another important trade-offs between the world's top 10 economic powers, Trump unlike democratic president Obama thinking, got out it with right tactic. This treaty, in fact, was commercials deal larger than North American free trade between this country and Japanese. During Obama time, ten other members participated in this treaty and member agreed to establish great freedom zone for their trade.

The important point in this contract is that now 40% of the world's total production is distributed to the consumed markets by these member countries and they have allocated 26 percent of international trade to themselves. Although according to available documentation, volume of economic deals between member states of the treaty prior to its implementation was one and half trillion dollars in the commodity and 242 billion dollar in the services sectors. Hence Donald, in a completely rational and expert movement, has preferred more financial gain for the United States than a common and widespread market. Donald knows that having a wealthy America with economic boom is more effective than presence in every international arena to achieving political influence [26-29]. He believes that he can achieve influence and effectiveness from better ways so he easily got out from this treaty.

However, some of economic experts and market analysts in this context believe that population close to 800 million in free trade zone can boost flow of funds resources among countries so that new emerging economics such as Chines and India unconsciously forced to follow it. But accomplishment of pacific transit treaty not only includes more trade restrictions that imposed on thousand goods from American drug products to dairy products from New Zealand, Japanese rice and Vietnamese ceramics, but also to a greater extent, made restriction on the Washington's government in economic fields .therefore, Trump intelligently came out of this treaty.

In other hand, Trump in unprecedented action either completely disconnected the military budget annually paid to the countries in all over the world on the basis of their political and regional priority or decreased these budgets to 50 percent and instead of grant and changed it to international short term loan. For instance during Obama presidency, the United States donated to the Egyptian army and Egyptian government from \$1.3 billion in the first year to \$1.5 billion in the last years. Or even did much more financial assistance to Pakistan army and country in past years. Today, with Donald presence,

this financial assistance has been completely cut off or will be paid in short-term international load with significantly decrease [30].

Most Donald's economic decisions are very effective and practical and maybe he is the only person who can be savior of declining economy of the United States. One of proceedings that we will soon see is division of NATO military budget between 28 countries that are membership of North Atlantic Treaty organization. Already, nearly 70 percent of this budget provided by USA. Donald emphasized that this would not happen for NATO budget of 1.5 billion Euros during his presidency and it will be very great help for various economic sectors in United States. Since this budget is variable and NATO costs has been estimated at nearly \$46 billion during last three years, so obviously we will see decrease of US economic assistance to NATO. Regarding to critical economic problems in Euro domain countries such as Greece, Spain, Portugal and Italy, it could be expected that NATO to be limited or collapsed in near future.

Donald will cut off the UN's huge budget of \$7 billion and \$300 million in 2017. Since, more than 40 % of United Nation budget was already provided by USA. Today Trump emphasized that like North Atlantic Treaty organization (NATO), any country should fairly pay its economic contribution to United Nation and other international institutions which are their members. So that, certainly other countries contribution will be grow significantly in the united nation.

Decreasing or cutting budget only make inefficient or ceremonially the most important international organization. Though nearly 140 countries were previously exempted from paying United Nations costs, but with this process it is possible a number of 193 unwanted members will exit from United Nations due to their inability to pay their membership fees [31-33]. So, this decrease of member will decline following mission of this organization as well as it makes difficult preventing many arbitrary international actions even war.

Undoubtedly in next steps Donald is following other problems which have cumbersome USA in other territory such as nuclear deal with Iran. Donald knows well that agreement with Iran perhaps hasn't any benefits for two parties, but USA despite of this agreement and other confidential provisions can only be taken on the path of the past, namely sanctions. Therefore, it is not far from the mind that he disregards this agreement or rejects it in order to gain more money and improve economic situation of his country. So that he can put Iran under greater pressure and earn more revenue [34].

### Donald's Multi-Dimensional Character

Donald Trump has higher emotional intelligence compared to last US presidents or even his electoral rivals. He has experienced pre-presidential affairs in different fields and has always played an important role. In not so long years ago, Donald was walking on the golf course as well as wrestling with a suit in a rig. He is the one who has enough expertise in American economic challenges and has already experienced the economic downfall in his empire. In addition his active presence in the sport at various rude and subtle levels has shown that he is capable person in the cultural and artistic fields. He has been active in the TV shows as he has been able to make a star on the Hollywood slate. He is writer of more than 18 books, their most famous and important are: "Trump: The Art of the Deal", "Trump: surviving the top", "Trump: The Art of the comeback" and "The America we Deserve".

### Conclusion

Looking at Donald Trump life and his decision making, we understand not only he has not done no structural, political or programmatic mistakes yet, but also precisely proceed within the framework of the principles and general principles of domestic and foreign policy of the United States and it can be easily said he is innocent in different fields especially in the racism as well he showed the best possible method and the most right behavior based on US laws, circumstances and culture. Also in other cases, he is trying to eliminate or lessen American problems with the logical and accurate decision making in favor of US and people of his country [35-37].

Perhaps the only factor that made some of Donald's decisions seem strange and unrealistic is the change in world order and move to a new discipline in the world. The term hegemony may not exist externally, and it is only a theoretical definition and today cannot unwillingly dominate on the governments and nations. Perhaps his behaviors is correct and in the logical frameworks of the United States, but no longer consistent with the new world discipline and human rights. However, it can be explicitly stated that Donald only wants to be the president of the United States.

What is certain is that Donald has already shown reasonable behavior to the United States if he is to maintain this process properly and well, but it is unlikely to continue on this path. He must know any mistake that comes from Donald will affect the United States and its periphery around. If his intention is launching a military strike against any country, Iran or North Korea causes irreparable damage the world [38]. Merely an attack on Iran is enough to not only Israel will disappear from the world map forever, as well all US bases and soldiers in the Middle East will be ruined. Hence does not seem that Donald wants to make a global mistake to pay his cost, a military strike against North Korea is no exception.

On the other hand, US internal structures are such that they can easily restrain the president and still did not see and clearly will not see any decisive action against Donald Trump in the United States. Although, there may raise some debates about his impeachment or halt some of Donald's orders by American executive, but these behaviors are more likely to reduce political tensions in the country, and it is impossible for him to be abandoned by the congress [39]. After US Trump hurricane, US needs a relative calmness with the promise of a Democratic woman, a woman who like Trump does not have any political record on her work resume, and will be the first female president of this very powerful country!
