

Global Entrepreneurship & Business Management: Current trends in physician entrepreneurship in USA, Europe, Turkey and emerging markets- Yavuz Selim Silay- Maqasid Angel Investors Network, Turkey Yavuz Selim Silay

Abstract

Pharmaceutical, biotech and medical device companies are constantly evaluating how innovation management can be improved and managing expectations of key opinion leaders. To gain these critical insights for physician entrepreneurship, our goal at society of physician entrepreneur is to accelerate innovations in order to improve healthcare. We seek to empower doctors, other healthcare providers and entrepreneurs with the information, resources, connections and experience they need to commercialize their ideas, inventions and discoveries. Current trends in physician entrepreneurship in USA, Europe, Turkey and emerging markets will be provided with unique cases. Dr. Yavuz Selim Silay a global leader and seasoned expert in Physician Entrepreneurship, Government engagement, Commercial Diplomacy, Corporate Communications, Government affairs & Medical Affairs will discuss how venture capital and angel investment networks are utilizing physician entrepreneurs to acquire these insights in a convenient, cost-effective, and compliant manner in this current changing global entrepreneurial landscape.

This work is partly presented at Global Entrepreneurship & Business Management Summit 2019, April 10-11, 2019, Toronto, Canada
