

Title: Impact of climate on Nepal economy and Way forward.

Ms. Merry Negasi Asheber

Nepal is a land-locked country located between big nations India and China. More than 70percent of total 27 million people in Nepal are directly or indirectly dependent on land as their basic means of livelihood. However, lack of farm commercialization has limited the contribution of agriculture at one-third of the total Gross Domestic Product (GDP) of the country. One of the many more challenges in macroeconomic field /area facing by our country is land management at a current political unrest situation. Due to the political liquid and translational period, neither our country has been able to increase GDP as the government expected nor, Government has made progress in agriculture business, tourism sector, industrial situation, monetary policy and investment policy. The scarce land in Nepal has been threatened from different phenomenon. Issue of land has been always a political issue in Nepal as more than 50,000-100,000 people are still landless and different political parties are using them as a 'vote bank' in every election for parliaments to local bodies.

On the other hand increasing population, land slide, soil erosion and rapidly growing urbanization across the country have posed a huge challenge to the management of land in the tiny Himalayan nation--Nepal. Land in the hilly remote areas are increasingly becoming fallow and deserted due to rapid migration to urban.

Biography

KARUNA KAR Ghimire, Nepal Bharatpur 11 chitwan

1. Physical exercise in the rehabilitation of dialysis patients
2. Recommendations of the Working Group of the Polish Nephrology Society regarding the quality criteria of dialysis treatment of patients due to end-stage.
