In this fame, we look forward for your contribution and astonishing dedication to make our Chronic Disorder 2020 more successful.

Insects (mosquitoes, lice, fleas, bed bugs) and ticks are able to transmit a number of diseases caused by infectious agents: viruses (chikungunya virus, yellow fever, dengue fever, etc.), bacteria (Lyme disease, plague, etc.), parasites (malaria, sleeping sickness, leishmaniasis, filariasis, etc.).

The most common insects that pass on disease are mosquitoes, sand flies, ticks, and fleas.
